

# WINDOWS INSTALLATION AND WALLET SETUP

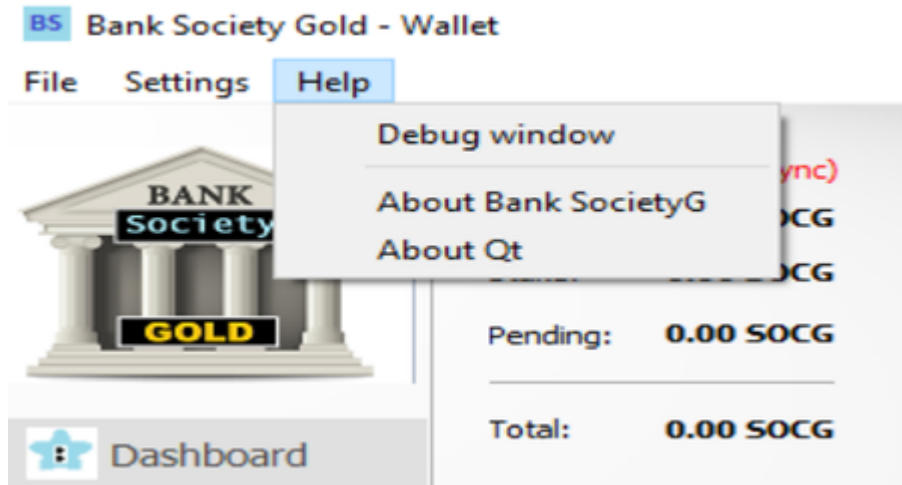

1. Download the application on the following URL:

- <https://github.com/SCL-BSG/Bank-Society-Gold/releases/tag/v2.0.3.0>

**societyG-qt.exe**

Execute the file **societyG-qt.exe** (if you use antivirus, add the exception).

2. Once is installed, open the Help Tab, Debug windows:

3. Open the SocietyG.conf:

4. And add the following configuration **societyG.conf** located in:

<https://github.com/SCL-BSG/Bank-Society-Gold/releases/tag/v2.0.3.0>

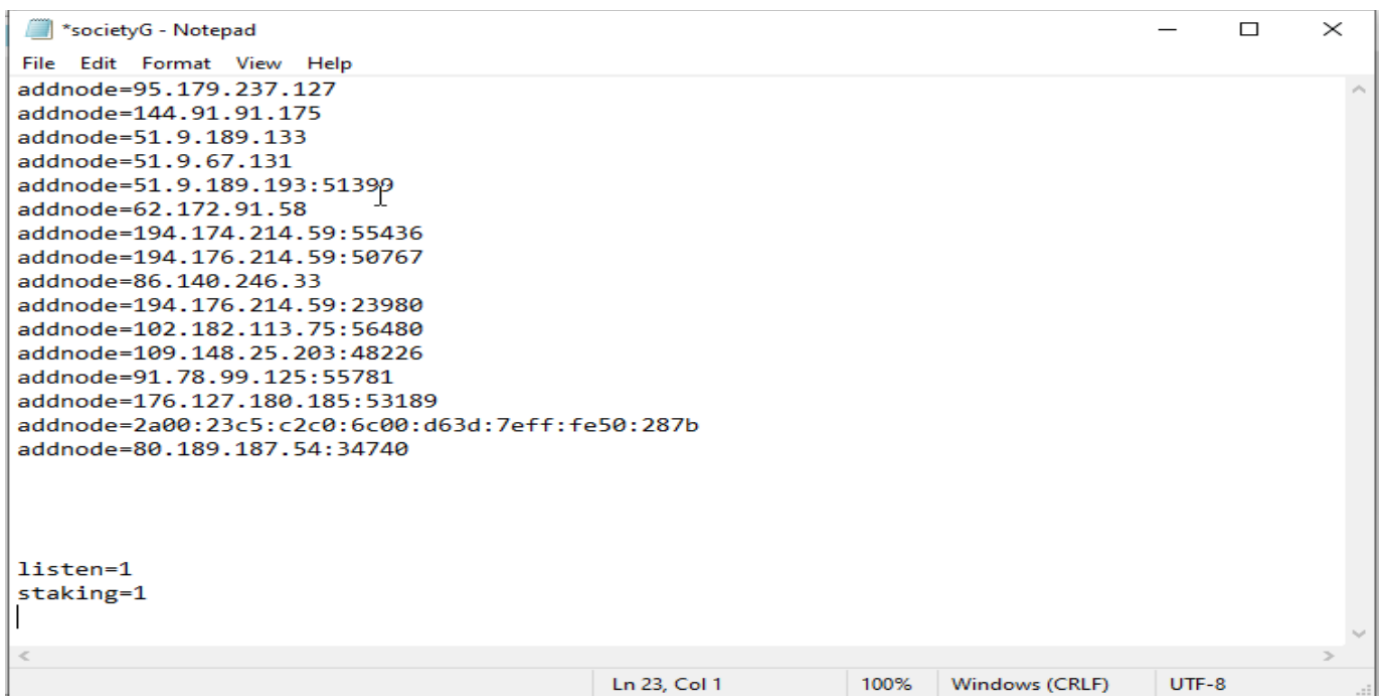

addnode=95.179.237.127

addnode=144.91.91.175

addnode=51.9.189.133

```
addnode=51.9.67.131
addnode=51.9.189.193:51399
addnode=62.172.91.58
addnode=194.174.214.59:55436
addnode=194.176.214.59:50767
addnode=86.140.246.33
addnode=194.176.214.59:23980
addnode=102.182.113.75:56480
addnode=109.148.25.203:48226
addnode=91.78.99.125:55781
addnode=176.127.180.185:53189
addnode=2a00:23c5:c2c0:6c00:d63d:7eff:fe50:287b
addnode=80.189.187.54:34740

listen=1
staking=1
```

The screenshot shows a Notepad window with the following text:

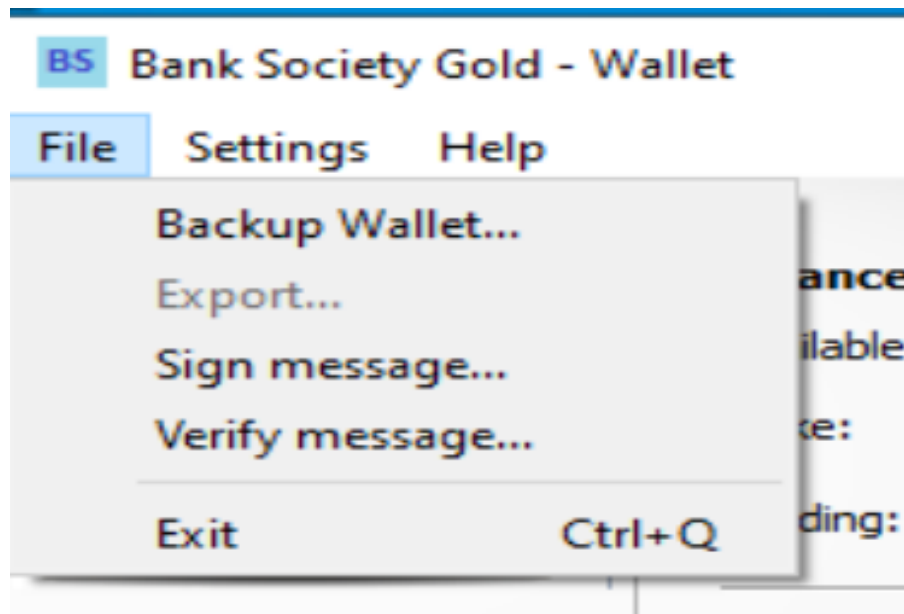

```
*societyG - Notepad
File Edit Format View Help
addnode=95.179.237.127
addnode=144.91.91.175
addnode=51.9.189.133
addnode=51.9.67.131
addnode=51.9.189.193:51399
addnode=62.172.91.58
addnode=194.174.214.59:55436
addnode=194.176.214.59:50767
addnode=86.140.246.33
addnode=194.176.214.59:23980
addnode=102.182.113.75:56480
addnode=109.148.25.203:48226
addnode=91.78.99.125:55781
addnode=176.127.180.185:53189
addnode=2a00:23c5:c2c0:6c00:d63d:7eff:fe50:287b
addnode=80.189.187.54:34740

listen=1
staking=1
```

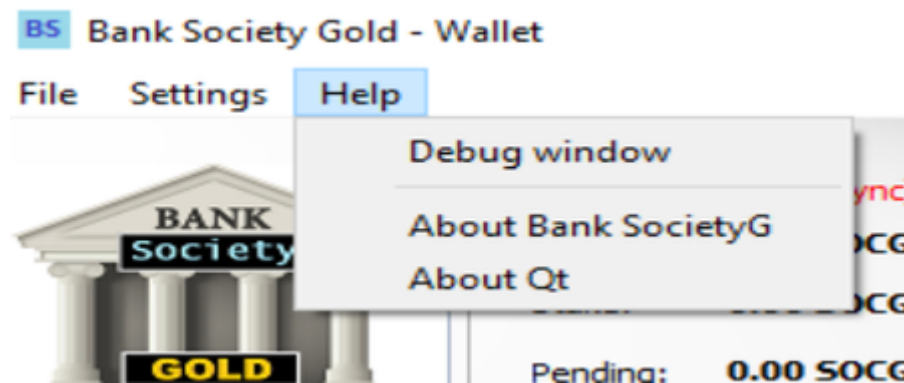

The status bar at the bottom indicates: Ln 23, Col 1 | 100% | Windows (CRLF) | UTF-8

Save the changes.

**5. Restart the application, File-Exit:**

6. Open the Debug windows:

And check the peers tab:

Information	Console	Network Traffic	Peers
Address/Hostname	User Agent	Ping Time	Se
95.179.237.127:23980	/SocietyG:2.0.1.7/	N/A	
144.91.91.175:23980	/SocietyG:2.0.3/	N/A	

If you have peers, it's the first symptom that the blockchain works.

7. Check in information if the Block Chain is adding new blocks (increasing):

Information

Console

Network Traffic

Peers

### Bank SocietyG Core

Client name SocietyG  
Client version v2.0.3.0-BETA  
Using OpenSSL version OpenSSL 1.0.1l 15 Jan 2015  
Build date Apr 1 2022, 13:17:58  
Startup time do. may. 15 00:22:11 2022

### Network

Number of connections 1  
Number of masternodes 0 / 0  
On testnet ☐

### Block chain

Current number of blocks 499  
Last block time lu. dic. 21 21:05:41 2020

### Troubleshooting

 Debug.log

 SocietyG.conf

 Masternode.conf
