LINUX INSTALLATION AND WALLET SETUP

1. **Download the following files:**

https://github.com/SCL-BSG/Bank-Society-Gold/releases/tag/v2.0.3.0

- societyG-qt
- societyG.confExecute societyG-qt through terminal:

root@BSG:/home/user/Downloads# ./societyG-qt

- **If it shows the following issue:**

/societyG-qt: error while loading shared libraries: libdb_cxx-5.3.so: cannot open shared object file: No such file or directory

- **Install the library:**

sudo apt-get install libdb5.3++-dev

- **Try again:**

root@BSG:/home/cudos/Downloads# ./societyG-qt

- **If it shows this issue:**

./societyG-qt: error while loading shared libraries: libboost_system.so.1.65.1: cannot open shared object file: No such file or directory

- **Install libboost-program-options1.65.1 deb package:**

sudo apt-get update

sudo apt-get install libboost-program-options1.65.1

- **Execute again:**

root@BSG:/home/cudos/Downloads# ./societyG-qt

If after the last execution still fails with this error:

root@BSGVM:/home/bsg/Downloads# ./societyG-qt
./societyG-qt: error while loading shared libraries: libQt5PrintSupport.so.5: cannot open shared object file: No such file or directory
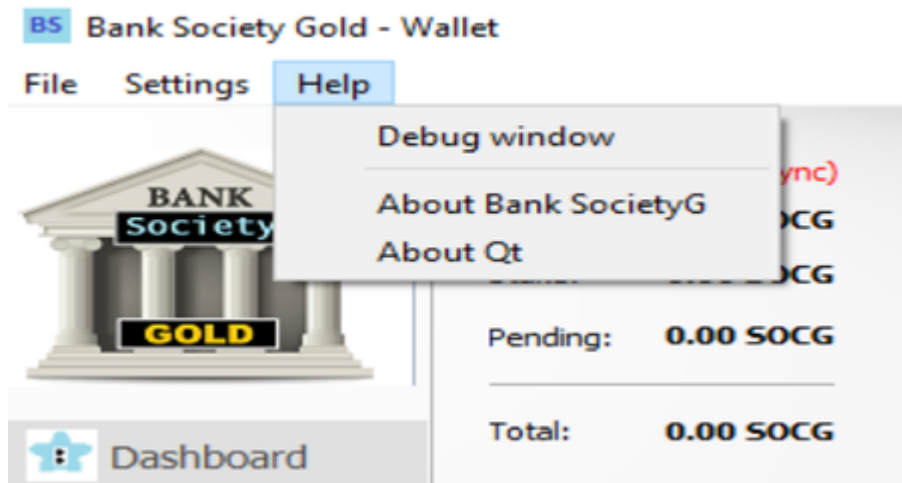

- **Install the following library:**

sudo apt-get install -y libqt5printsupport5

It should work! if it's not the case, send an email to support with the logs details.

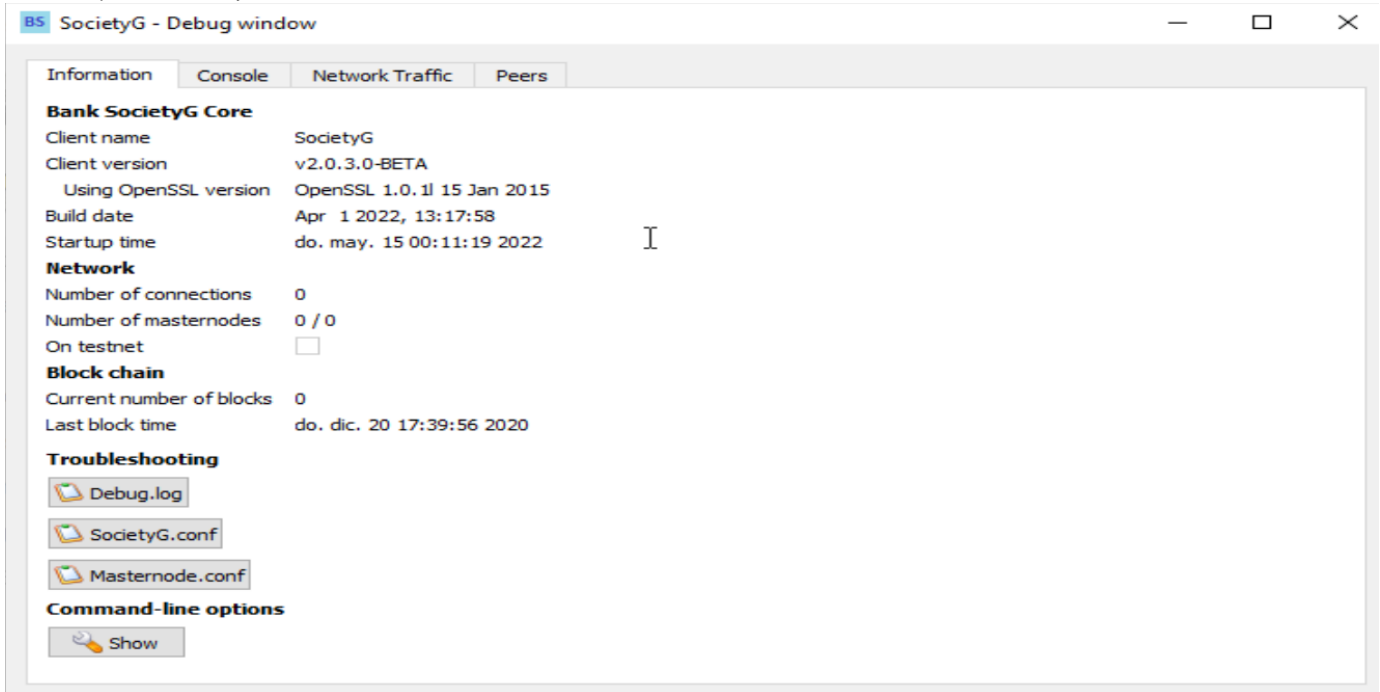

Setup of the wallet

Wallet Configuration:

1. Once the wallet is installed, open the Help Tab, Debug windows:

1. Open the SocietyG.conf:

1. And add the following configuration societyG.conf located in:

https://github.com/SCL-BSG/Bank-Society-Gold/releases/tag/v2.0.3.0

addnode=95.179.237.127

addnode=144.91.91.175

addnode=51.9.189.133

addnode=51.9.67.131

addnode=51.9.189.193:51399

addnode=62.172.91.58

addnode=194.174.214.59:55436

                          Ln 23, Col 1         100%   Windows (CRLF)   UTF-8
```
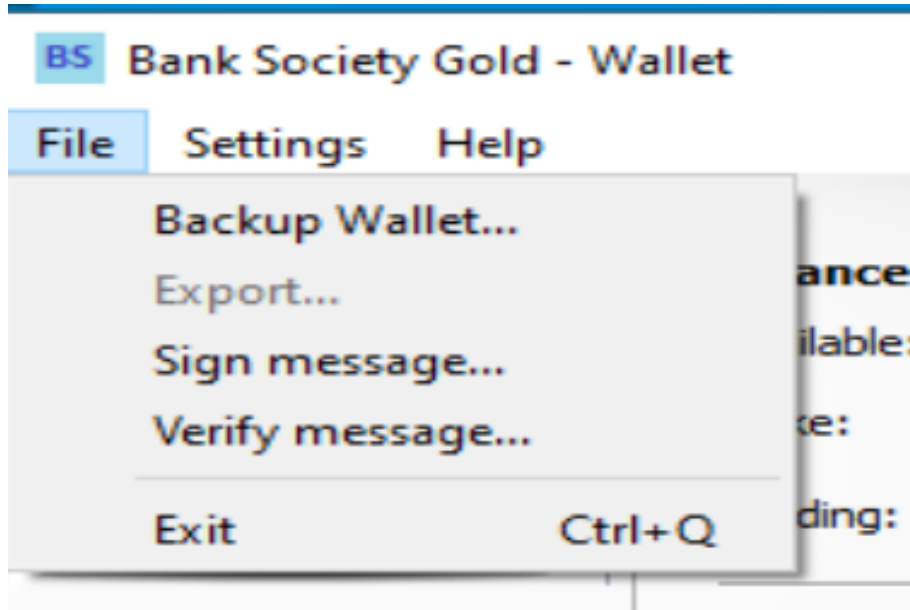

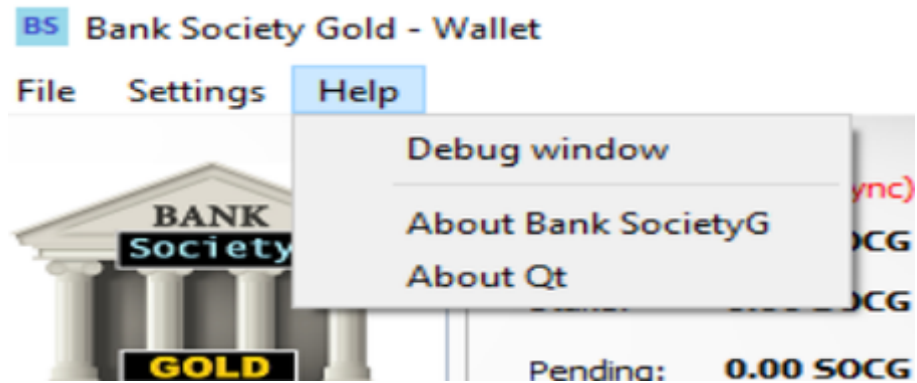

Save the changes.

1. Restart the application, File-Exit:

BS **Bank Society Gold - Wallet**

File   Settings   Help

Backup Wallet...

Export...   ance

Sign message...   ilable:

Verify message...   te:

Exit   Ctrl+Q   ding:

1. Open the Debug windows:

And
check the peers tab:

If you have peers, it's the first symptom that the blockchain works.

1. Check in information if the Block Chain is adding new blocks

(increasing):
